

CONFIGURATIONS

The new Max Clays Sporting is offered in both fixed and adjustable ramp tapered rib configurations. The traditional fixed ramp and flat tapered ribs allow the shooter a 50/50 or 60/40 POI. The adjustable ramp tapered rib configuration allows the shooter the advantage of a raised head position and POI from 50/50 to 70/30.

TAILORED FOR CONSISTENCY

Max Clays Sporting stocks are available in multiple configurations. All standard stocks are fitted with an adjustable comb. This results in a tailored, precise fitting stock that promotes consistent gun mount. The forend is a traditional Euro design, and both the stock and forend are cut from high quality English walnut. Custom dimensions and/or custom stocks are available.

MAXIMUM PATTERN EFFICIENCY & LOW RECOIL

The standard barrels on the Max Clays Sporting are Kolar's innovative .740 bore, 1550 KG lite contour barrels. Combined with extra long forcing cones and precise taper factory titanium CTs, they provide maximum pattern efficiency and extremely low recoil characteristics. The gun is available with a matched weight carrier barrel and Kolar Max Clays Sporting 20, 28 and .410 for sub-gauge events.

PATENTED MECHANICAL TRIGGER

The Stage II trigger is selectable and adjustable for blade placement. It features a unique interlock to eliminate the possibility of fan-firing. The coil spring driven trigger features an enhanced A2 hammer/sear configuration to ensure precise trigger pull, with no slack or takeup.

All guns are supplied in a hard case.

AVAILABLE IN:

ADJUSTABLE TAPERED: Standard - 50/50% - 70/30% POI

FIXED RAMP TAPERED: Standard - 60% POI

FIXED FLAT TAPERED: Standard - 50/50% POI
